

PLANET PROFESSIONAL SERVICES

Accelerating your time to value

INTRODUCTION

We understand the challenges involved in moving from an ambitious idea to execution to valuable insights. As you adopt Planet data, Planet's Professional Services team is here to be your partner, helping you achieve your vision and maximize your return on investment.

Our Professional Services team is a group of industry-leading experts with a wide variety of skills and experience. They help customers to rapidly build solutions with Planet's platform, reducing the time to see value from Planet's data. To do this, we provide several offerings including architecture workshops, training, integration services and more.

PROFESSIONAL SERVICES OFFERINGS

LAUNCH PROGRAM

The Planet Launch Program is designed to help our customers onboard quickly. Our experts help you quickly achieve return on investment, equipping your team with the expertise to drive value from Planet's imagery, APIs, and services, so you can achieve greater mission impact.

PROGRAM DETAILS

- 14-day program which includes three days of onsite planning, training, implementation & integration assistance, and more.
- Best suited for new customers who aim to use Planet products at large-scale and want to ramp up quickly.

ARCHITECTURE WORKSHOP

Planet Enterprise Architects are experts in designing and integrating enterprise systems and will work with your team to understand your existing systems, processes, and workflows to create a roadmap for smoothly integrating Planet's data.

- 2-day onsite workshop
- Deliverables include an architecture summary of the future state of your workflow, and a proposal & timeline for an Integration or Data Services package.
- Ideal for customers who need to integrate Planet data into complex enterprise systems.

PLANET TRAINING

Planet's Training and Certification Program enables customers and partners to leverage remote sensing and Geographic Information System (GIS) data in the most effective manner. Maximize the power of Planet data by learning best practices in remote sensing and advanced topics like utilizing Planet's APIs and data services.

- 2-4 day onsite training or a virtual option are available.
- Choose from modules that best fit your training needs, from Remote Sensing 101 to developing solutions with Planet's APIs.
- Ideal for customers and partners who want to equip their team with best practices in using high-frequency geospatial data.

INTEGRATION & DATA SERVICES

Planet's Professional Services team will work with you to implement an integration or provide custom data deliverables that will scale with your business, maximize return on investment, and accelerate your time to value.

- Deliverables are determined by a Statement of Work to meet your specific integration or data requirements.

QUICKSTART

Invest in Planet's QuickStart to ensure successful use of Planet's imagery within your organization. Work directly with our expert consultants or participate in virtual, online training. Receive flexible assistance for exactly what you need help with.

- 16 hours of Professional Services work to be used as needed on training or consulting on best practices for working with the Planet Platform.
- Ideal for customers and partners who are new to using Planet but only need a small amount of assistance in reaching their goals.

WHY WORK WITH PROFESSIONAL SERVICES?

Accelerate Time to Value

Quickly integrate Planet imagery into your solution or workflows.

Maximize your ROI

Efficiently achieve value from your investment in Planet.

Innovate More Quickly

Identify the best solution to your challenges and learn best practices.

Unlock the Full Potential

of Planet's Platform with consulting from leading remote sensing experts.
